**StampaJet BP Series - Digital Fabric Printing Made Easy**

StampaJet BP-54 a new generation low cost textile printer, utilizing an all in one fabric transport system and curing station, designed for digital fabric printers who require easy to use equipment, high print speeds and exceptional quality. The StampaJet BP-54 printer allows 54” wide continuous fabric printing, with refillable ink system, integrated fabric handling and exceptional color control with exclusive Evolution RIP, combined with a competitive price opens new opportunities in digital textile printing.

**256 ft2/h Plug & Print Digital Textile Printer**

Digital textile printing is finally made easy thanks to the StampaJet’s top quality print results at production speeds of 19 linear yards per hour.* The machine requires minimal assembly and ships with our proven Evolution RIP® software which makes fabric printing simple and repeatable. Just connect the electric power, load ink and material and print.

*Depending on actual print width, resolution and pass - see the production table on the back side of the brochure.

**Latest Print Head Technology Providing Speed and Quality**

The StampaJet BP series comes with the new extra wide 8 channel variable dot Piezo print head addressable to 1440 DPI. The distance from the print heads and the fabric surface is manually adjustable to 2mm. On board cleaning and maintenance provides quick and easy head cleaning to stay up and running.

**Integrated Fabric Handling and Curing System**

The fabric transportation system allows users to load fabric print and cure without the time or labor of a two step process. A precision winding, unwind mechanism moves fabric precisely and smoothly through the printer and our proven curing system providing the correct amount of curing time. StampaJet BP 54 is the ideal printer for Flag and Sign shops, POP and Print Service Providers.

**Winding and Unwinding System**

StampaJet BP series allows for large roll up to 200lb to be loaded in order to give a user the ability to do large unattended runs.

**Hot Air Curing Dryers**

StampaJet BP series utilizes hot air curing in a self contained chamber and ships with an air cleaning system. Loading fabric into the dryer is hands free providing a user piece of mind that they will not be injured. The curing chamber is digitally controlled for optimal working temperature and speed.

**Bulk Ink Supply System**

The StampaJet BP series can print with disperse and pigment and sublimation inks via a refillable bulk ink feed system or self-contained 220/440 ml cartridges.

| **Print width, roll size** | Maximum print width: 136 cm (53.5")
Maximum roll size may depend on weight (up to 200 lbs) |
| **Print Resolutions** | 360 x 720 dpi, 2 pass, bidirectional
540 x 720 dpi, 6 pass, bidirectional
720 x 720 dpi, 4 and 8 pass bidirectional
1440x1440 dpi, 8 pass, bidirectional |
| **Ink feed system** | Ink feed system 4, 220/440 ml cartridge or 4 refillable cartridges |
| **Inks** | Pigments, Disperse/Sublimation 4 colors |
| **Interface** | Ethernet 10/100BASE-TX |
| **Noise level** | 70dB or Less (printer only - does not include exhaust) |
| **Dimensions** | Width: 91” - Depth: 35” - Height: 54”
Weight: 600 lbs |
| **Electric supply** | Printer: AC110V - 240V - 50/60Hz
Curing Unit: AC 220-240V - 50/60Hz - 20Amp installed power - working power may be lower |
| **Working environment** | Temperature range: 20-32 °C/ 68-89 °F
Humidity 40-60 % rh (no condensation) |
